

# WEC Attendee Socrates Update

Dear WEC Attendee,

We welcome returning and new guests to the most important financial event of the year – the 2022 World Economic Conference (WEC)!

As we make the final preparations, we wanted to share a summary of recent updates and some exciting new features for the Socrates Platform!

## **NEW: Economics Tracker!**

- The Socrates Platform was designed for users to research global economies via the Heat Map, Global Stock indices, Forex, and Bonds

... and now we're excited to announce the new Economics Tracker to build on that goal...

- This new collection of Covered Markets is comprised of key economic indicators (such as GDP and CPI) for various countries around the world
- At launch, the initial beta version of the Economics Tracker (found in the "Socrates Markets" section) will include a select number of countries and data points with plans to expand it over time

## **Updated Watchlist!**

- Earlier this year we introduced the ability for users (with Plus membership and above) to have up to 5 different custom Watchlists on the Socrates Platform

...but we didn't stop there...

- Included in our release published just in time for the WEC, we updated the Watchlist to display a price chart and additional data points for the single market view
- As for the "show all" view (a full Watchlist in a single table), we added a "Price Movement" column displaying a trend line of recent price closings for

each market in that time level – enhancing the “birds eye view” benefit of the Watchlist

### **New: Market Movers (% Price Change – Visible to All Members)**

- A new module added to the standard platform members homepage, highlighting the top & bottom moving Covered Markets identified by the computer system (based on % price change)

### **Updated Market Finder (a Socrates Business Exclusive)**

- Ability to apply a Market Finder search query against a Watchlist
- Ability to save Market Finder search queries for quicker, easier repeated use of this unique tool
- Additional search options added for Reversals
- Users can now also search for alignment of indicating ranges (all bullish, all bearish, and all neutral)

### **Updated Plus Membership**

- Now receive 1 user-selected Detailed Market Subscription
- As mentioned above, Plus members (and above) now have the ability to add up to 5 different Watchlists

### **Updated Pro Membership**

- Similar to the update to Plus membership, Pro members will now receive 1 user-selected Detailed Market Subscription
- This is in addition to the 1 user-selected Premium Market Subscription Pro members already have

### **Updates for Socrates Business version**

- Earlier this year we crossed the first anniversary since we launched [SocratesBusiness.com](http://SocratesBusiness.com)
- For those who aren't familiar with it yet, Socrates Business is intended as a step up from Pro Membership, unlocking unique features as well as Quarterly & Yearly Reversals and Arrays for licensed markets
- In addition to the updates for Market Finder (mentioned above), we also introduced the availability of Socrates Business Snapshot Reports earlier this year
- Licensed users can now add Market Access Credits to their Socrates Business License Agreement (follow up with your account manager for more details)

- Socrates Business is exclusively available as an annual license with a minimum of 25 licensed markets for 1 user
- To see if Socrates Business might be a fit for you, please take the survey [CLICK HERE](#).

We are also excited to announce that we plan to continue producing webinars throughout the year hosted by Erwin Pletsch. Check our Armstrong Economics website under the "events" page for updates.

- We've made several other updates and fixes throughout the year, including improved Site Search and enhancements to the new Fullscreen Charting we introduced last year\*. We hope you're as excited for these updates as we are, and we look forward to delivering more updates in the coming year.

#### **REMINDER Socrates Help Center**

- We rolled out an updated version of the Members Knowledge Center in 2021, which centralizes content about the proprietary models, features and general information about the Socrates Platform we hope you find useful

As always, we greatly value our customers, appreciate feedback, and strive to continue improving the Socrates Platform!

Enjoy the 2022 WEC!

The Socrates Platform Team

*\* The Fullscreen charting feature is available to Pro members (for Premium Market Subscriptions) and licensed Socrates Business users (Licensed Markets).*

All the best,

AE Events Team
